

HandyEat | Midterm Review

Team: E.W.C

Completed Tasks

1. Decided user group
2. Analyzed user's demand
3. Analyzed market
4. Confirmed main goal
5. Listed our limitations/constrain
6. Decided developing methodology
7. Listed all the tools we need:
 - GitHub, ProcessOn, MockingBot, Sketch, Xcode, Android Studio
 - We will do more research on tools that can keep tracking of our process, store our meeting history and review everyone's efforts, such as Write, Asana, etc.

Review and Expectation

We have completed our first milestone, which is basically analysis the market, gathering requirements and confirming our main goal. We spent totally 3 weeks (10/2 -10/24) to achieve this milestone. We discussed all the features and functions our product should have. To achieve this, we found some real data to support and prove our analysis, such as restaurants annual revenue in MN, customer's average cost for dining and drinking.

In the future, we will spend more time on designing application's logic and user experience by using listed tools. We are also going to focus on functionality of our app by applying user and restaurants' needs.

Updated Schedule

	1. Analysis & Define the App (FINISHED)	2. Developing Process	3. Final Report
Shilong Wang	Discuss together (But Yu Chen will write the draft)	2.1, 2.3	3.1, 3.4
Hsiang Teng		2.1, 2.5	3.2, 3.5
Yu Chen		2.2	3.1, 3.3
