5. Listing a set of constraints/limitations

Technical Constraints

Programming Language – Focus on Kotlin(Android) & Swift(iOS)

Operating System/Platforms – Focus on mobile Operating System (Android & iOS)

Specific Library/Framework – Focus on Android & iOS

Business Constraints

Schedule – Time Frame for Application deliverable.

Budget – Disburse of Developing Application

Software Restrictions – Government Regulation & User Privacy

Other Constraints

Resource – Team Member & Equipment(Computer)

6. Determining development process model/methods

Phase Development

Iterative Development – Deliver with Full system, then improve functionality of each subsystem with each new release
