Tools:

ProcessOn - Making flowchart from online

- Create flowchart for our entire system logic and our apps workflow.

GitHub – Documentation

- Save and update all the documents we have.
- Keep all assignments and schedules in one place to make sure every team member is on the right position.
- Post questions and solve it together without a face-to-face meeting.

Sketch – UI & Logo Design

- Design app's user interface and logo on mac.

MockingBot – UI Prototyping

- Apply previously designed UI to create prototyping of the app from this online tool. We can demonstrate and test our prototypes.

Android Studio – Developing environment for Android platform

Xcode – Developing environment for iOS platform
